

Practical 4 - Airtable Workspace and Base Setup

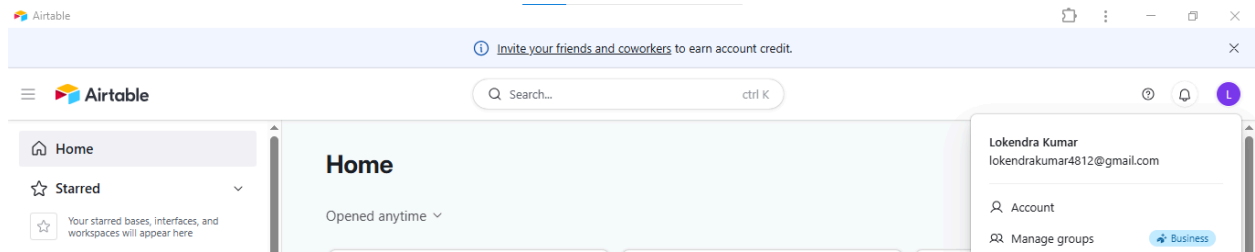

Actionable Tasks: 1.

Task 1:

Sign Up for an Airtable Account.

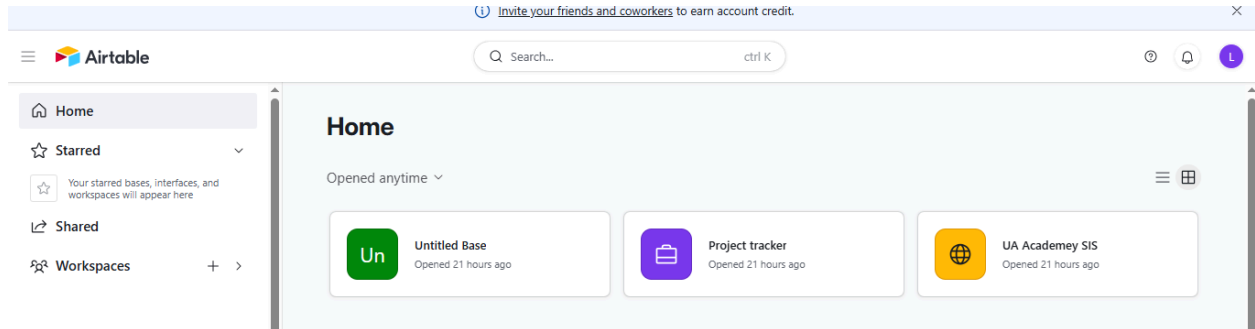

Create a free account using your email address.

Example: Chef [lokendra kumar], welcome aboard!

2. Task 2:

Create a New Base in Airtable Click "Create a base" and choose "Start from scratch."
Name your base "[Lokkendra kumar]'s Culinary Delights."

3. Task 3: Understand the Workspace Interface and Basic Functionalities

In the main workspace, the panels on the left are table lists. Click and hold to rename the default table to "Recipes." This will be your recipe haven. Now, let's define the details for each recipe. Click the "+" button to add new fields. Chef [Lokendra kumar] is building an arsenal of deliciousness! Here's what we'll include:

- "Dish Name" (Single-line text): The glorious title of your masterpiece.
- "Description" (Single-line text): A brief overview to whet everyone's appetite.

Student Name	Profile Photo	Date of Birth	Enrollment Date	Contact Email
Enrolled Lucas Chen		6/22/2008	1/10/2024	lucas.chen@email3b56.c
Enrolled Lokendra kumar		1/1/2004	11/14/2025	lokendra@gmail.com
- Record...	-	-	-	-

4. Task 4: Create Linked Tables Within the Base

Create another table called "Cuisines" to categorize your recipes. In the "Recipes" table, add a "Linked record" field called "Cuisine". Now, when you create a new recipe, Chef [Your Name] can link it to the specific cuisine

in the "Cuisines" table. This allows you to easily filter and find recipes by their culinary style!
